Job Objectives

A detail-oriented Frontend Developer with a solid foundation in HTML, CSS, and JavaScript, and hands-on experience using Bootstrap and React.js to build responsive and user-friendly web interfaces. Skilled in developing clean, maintainable code and creating modern, visually appealing designs that enhance user experience. Adept at collaborating with teams to implement interactive components, optimize performance, and ensure mobile-first responsiveness across various devices. Eager to apply my skills and contribute to the company's projects while continuously learning and growing as part of a dynamic development team.

Profile Summary

I am a frontend developer with practical experience in building responsive and interactive web applications using **HTML, CSS, JavaScript, Bootstrap, and React.js**. My projects include an **E-Commerce Website**, a **Habit Tracker**, and a Barcode and QR Code Generator, showcasing my ability to develop functional and scalable user interfaces. I have a good understanding of version control using **Git and GitHub**, and enjoy **collaborating on projects** to bring creative and technical ideas to life.

I'm familiar with implementing Responsive Design principles and working with Modern Frontend Tools and frameworks. I aim to contribute to a Professional Development Team where I can apply my skills, Continue Learning Advanced Frontend Technologies, and help deliver high-quality, scalable web solutions.

In addition to frontend development, I have created a voice agent using Python and APIs, and possess strong knowledge of making and integrating API calls. I am eager to contribute to a professional development team, apply my technical skills, and continue learning to deliver high-quality, scalable solutions across both frontend and backend integrations.
